Home Insulation Box

Everhart is an outstanding manufacturer of wholesale and retail bags. It was established in 2014, with excellent quality, reasonable price and good service attitude to win customers praise. The market for Home Insulation Box took off as living standards improved and the frequency of family weekend picnics increased. In addition, with the outbreak of COVID-19, the food delivery industry is in urgent need of insulated containers to transport food and items ordered by customers. As a result, the catering industry is buying large quantities of Home Insulation Box to keep takeaway food safe and warm. Everhart Home Insulation Box to see the market opportunity, waved to customers at home and abroad.

Introduction of Everhart Home Insulation Box

It's a new product from Everhart in the last two years. In order to meet the needs of the catering industry for food insulation and customers going out for picnic, we specially invited our company's R & D staff to design a long-term preservation, dual-use cold and warm, green material, large capacity, good sealing, stable and solid incubator from the aspects of ergonomics, environmental protection and safety, as well as heat preservation and cold protection.

Using high strength EPP foam, long insulation. Large capacity design, stable bottom, prevent food soup from spilling.long time heat preservation and cold protection, protect your health, with strong seismic ability. Can be used with the ice pack, convenient portable design, user-friendly design. No need to plug in, environmental safety. It can be used for river fishing, field camping, picnic outings, and friends' parties.

About the size:

The dimensions of all products, including outer diameter, inner diameter, height (depth), weight are strictly measured. In the process of large-scale production, because the raw material can not be absolutely stable, so there will be a certain amount of weight fluctuation, generally ±5% as

the normal error; Due to small losses or small changes in the mold in the production process, it is possible to cause small changes in the outer and inner diameter and depth. Generally, the outer and inner diameter is ±2mm and the depth is ±4mm as normal errors. Normal error will not accept complaints or returned goods, if you care about please inform the manufacturer before placing an order.
