and you'll get excellent after
-sales service

7.FAQ

Q: Why does the PU foam not work well when the weather is extremely cold?

A: Generally, the best application temperature of PU foam is between +18°C to +30°C, if the temperature is too low, it will be affected.

Tel: +86-20-84267539

Email: enquiry@gnsealant.com

Q: What factors cause the bad cell?

A: It 's about the application temperature, insufficient humidity and the quality of the product itself.
