Kitchen Food Garbage Processor Disposal Crusher

Kitchen Food Garbage processor Disposal Crusher is one of the must-have appliances for home kitchens. The appliance is installed under the kitchen sink and is connected to the sink outlet. Food waste such as leftovers, leaves, and stalks can be poured directly into the machine and ground and crushed in an instant, flowing into the drain pipe with water.

With the development of society, the free "convenience bag" is restricted, and the dirty garbage can only be used in the handy bucket, and the smell is odorous. Environmental protection has become a concern for everyone. The pollution of the home environment makes everyone feel anxious about the quality of life of themselves and their families. After busy work, they always want to find a peace and warmth at home. A delicious home-cooked meal, a plate of fruit, and a cup of tea have become a kind of enjoyment for everyone, but after the food, kitchen garbage is also born, which makes people worry. In response to the disaster of domestic garbage, kitchen garbage disposal machines came into being.

No sewer blockage can occur with the Kitchen Food Garbage processor Disposal Crusher. Because the food waste is ground into a slurry liquid and under the action of the randomly accelerated water flow, it can effectively remove the greasy sticking to the wall of the lower pipe and play the role of grinding, flushing and cleaning the sewage pipe.

parameter

Model	SS-8550CS
Application	Home Use
Input Power	550W
Horsepower	3/4 HP
Voltage	110V/220V
Current	3.25A
Frequency	50/60Hz
Rated Rotary Speed	3200-3600RPM
Motor	Permanent Magnetic DC motor
Grinding Capacity	1100ML
Grinding System material	Stainless steel
Safety protection	Overcurrent & overload protection
optional sink connector	140mm,160mm,180mm
Sound-proof system	Double hollow structure

ON/OFF	Air Swith
Number of users	6-7 People
Warranty	2 years
standard life	8-10 years
Weight	5.0KG
Size	410mm(H) x 205mm(W)

Method of operation

1. When using the garbage disposer, you should also carefully read the types of garbage that can be handled in the manual, such as plastic bags, glass, shells, bones, pig's trotters, scorpions and other large pieces of hard objects, etc., generally do not use garbage disposal machines . At the same time, after the garbage disposal machine has processed the food waste, do not immediately turn off the faucet, and then rush for more than ten seconds with the tap to completely flush the food waste into the sewer to clean the garbage.
2. The price of garbage disposal machines ranges from a few hundred yuan to a thousand dollars, and consumers can choose according to their own needs. The most popular products on the market are domestically produced products. Their biggest feature is the high quality of crushed garbage, and the service life is about one or two decades. Generally, in the place where the whole cabinet is purchased, there is a garbage disposal machine, which is preferably selected together with the cabinet, so that the cabinet and the garbage disposal machine can be more matched
