### Kitchen Waste Crushing Garbage Processor

The kitchen waste crushing garbage processor grinds the food residue into powder or fine particles and discharges it along the water through the sewer. It can handle egg shells, poultry bones, paper towels, fish bones, melon chips, vegetable stems, tea leaves. Dozens of leftovers left in the food, from the source to eliminate and control the production of bacteria and ensure the cleanliness of the living environment, such as eliminating the garbage dripping phenomenon in the kitchen hallway floor, reducing the daily consumption of repeated garbage disposal, ants, mosquitoes, flies and other pests living environment.

Product parameters :

Model	SS-8375AB
Product Application	Home Use
Input Power	375W
Horsepower	1/2 HP
Voltage	110V/220V
Current	2.25A
Frequency	50/60Hz
Rated Rotary Speed	2800/3200RPM
Motor	Permanent Magnetic DC motor
Grinding Capacity	700ML
Grinding System material	Stainless steel 304#
Safety protection	Overcurrent & overload protection
optional sink connector	140mm,160mm,180 mm
Sound-proof system	Double hollow structure
ON/OFF	Air Swith
Number of users	2-3 People
Warranty	2 years
standard life	8-10 years
Weight	3.70KG

Kitchen waste crushing garbage processor

1. Modest appearance, strength conservation, reflecting the texture of life

The design of Chinese cham, combined with the oriental characteristics, is vividly expressed by the exquisite craftsmanship, showing strength and taste.

2. Using high performance permanent magnet DC motor, durable

This motor has large starting torque, strong power, strong processing capacity, quieter and longer lasting.

### 3. All stainless steel grinding system, life-long without interference

The food waste disposer grinding system is made of high-quality stainless steel, which makes the wear resistance doubled compared with ordinary stainless steel, and it is maintenance-free for life. All models of food waste disposer use stainless steel grinding cones, without blade grinding disc design, can grind large Part of the food waste, and can avoid most of the card machine phenomenon, not only the grinding effect is better, the work efficiency is higher, and it is safer and more humanized.

### 4. Three-point locking clasp, scientific and stable

The food waste disposer adopts a three-point locking snap ring, which can lock the machine more stably and securely. It can ensure that the food waste disposer will not loosen under long-term operation, and will not age, effectively avoiding the gap between the machine and the sink. Larger vibrations ensure that the high-end cabinets and sinks you install are not damaged.
