### Sink Food Waste Disposer

Sink Food Waste Disposer is a modern, new environmentally friendly kitchen appliance that uses a new approach to the treatment of food waste in modern homes: leftovers, meat spurs, vegetable stalks, melon husks, eggshells, tea leaves, small pieces of corn Rod core, poultry and small bones, etc., by changing the shape of food waste to timely and innocent treatment of foodwaste, to achieve instant, convenient and fast kitchen cleaning.

Sink Food Waste Disposer is installed under the kitchen sink and connected to the drain pipe. The food waste disposer grinding system is driven by a small DC or AC motor. The food waste in the crushing chamber is crushed several times by centrifugal force, and milled again. Grind into fine particles of less than 3 mm, then drain into the sewer and discharge directly to the sewage treatment plant.
