Speed Kitchen Food Waste Disposer

The food waste disposer drives the cutter head through a small DC or AC motor, and uses centrifugal force to crush the food waste in the crushing chamber and discharge it into the sewer. The pulverizing chamber has a filtering function to automatically intercept the solid particles of food; the cutter head is provided with two or four impact heads that can be rotated 360 degrees, without sharp edges, safe, durable and maintenance-free. Cutter speed (full load, working condition) DC motor is about 2000-4000 rev / min. The pulverized particles are less than 4 mm in diameter and do not block drains and sewers.

parameter

Model	SS-8375CB
Application	Home Use
Input Power	375W
Horsepower	1/2 HP
Voltage	110V/220V
Current	2.25A
Frequency	50/60Hz
Rated Rotary Speed	2800/3200RPM
Motor	Permanent Magnetic DC motor
Grinding Capacity	1000ML
Grinding System material	Stainless steel
Safety protection	Overcurrent & overload protection
optional sink connector	140mm,160mm,180mm
Sound-proof system	Double hollow structure
ON/OFF	Air Switch
Number of users	5-7 People
Warranty	2 years
standard life	8-10 years
Weight	4.3KG
Size	385mm(H) x 205mm(W)

The advantages of using a food waste disposer are as follows:

1. For residents:

- 1 reduce the smell of the kitchen, especially the cabinets that store the trash cans;
- 2 reduce the possibility of breeding cockroaches and bacteria;
- 3 Make cleaning and discharging household waste a clean and easy job;
- 4 is conducive to maintaining the hygienic environment of stairwells and residential quarters.

2. For the sanitation department and property management:

- 1 Improve the environmental sanitation environment;

2 effectively reduce waste production;

3 reduce the secondary pollution of the garbage collection and transportation process;

4 Reduce the difficulty and cost of garbage collection and processing.

3. For the municipal and traffic control departments:

1 increase the content of perishable organic matter in sewage, which is beneficial to the biochemical process of sewage treatment plant;

2 Reduce the number of garbage trucks and the pollution of the road surface caused by garbage dripping.

4. For the environment and resource recovery:

1 Reduce the pollution of recyclable materials from kitchen waste and improve the recovery rate of resources;

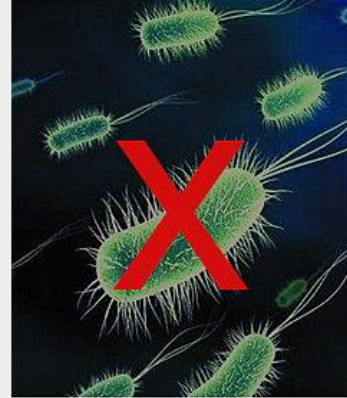

2 Improve the treatment conditions of landfills and incineration plants, and reduce the discharge of pollutants such as leachate, biogas and flue gas.

The kitchen is ground to foam
Refuse clogging of sewer

Locking hose
Waterproof bed bug

Prevent bacterial growth
Family health and worry

EASY TO OPERATE JUST THREE STEPS

1.Open the tap

2.Start smart switch

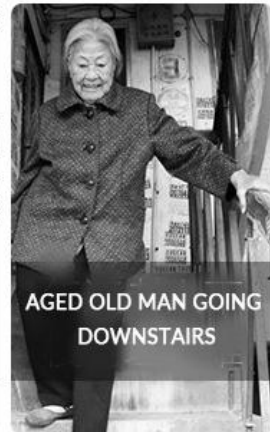

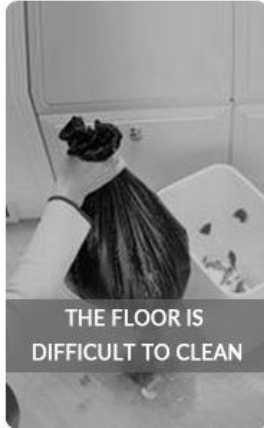

3.Pour food waste

Easier garbage disposal

Easily grind fruits, vegetables, eggshells, tea and all kinds of small bones and other leftovers, and experience a clean and fresh kitchen.
