## Kitchen Food Waste Grinder Machine

Kitchen Food Waste Grinder Machine can only smash organic waste such as leftovers, meat spurs, vegetable stalks, melon husks, eggshells, tea leaves, small corn cobs, poultry and small bones; instead of glass ceramics, metal Bottle caps, plastic foam, leather rubber, stones, and other items are placed in the treatment.

Users are advised to take scientific care of the household food waste disposer, as good use and maintenance practices will ensure that the machine quality is as new.

parameter

Model	SS-8375DB
Application	Home Use
Input Power	375W
Horsepower	1/2 HP
Voltage	110V/220V
Current	2.25A
Frequency	50/60Hz
Rated Rotary Speed	2800/3200RPM
Motor	Permanent Magnetic DC motor
Grinding Capacity	1000ML
Grinding System material	Stainless steel
Safety protection	Overcurrent & overload protection
optional sink connector	140mm,160mm,180mm
Sound-proof system	Double hollow structure
ON/OFF	Air Swith
Number of users	5-7 People
Warranty	2 years
standard life	8-10 years
Weight	4.4KG
Size	385mm(H) x 218mm(W)

maintenance:

- The motor of the household kitchen food waste disposer has been permanently lubricated, so no additional lubricant is required.
- To extend the life of the food waste disposer, you can dean the waste disposer with a neutral detergent every three months. (The cleaning cycle can be shortened appropriately in summer)
- Do not put alkaline or other chemicals into the household food waste disposer when using it, as this will cause corrosion and damage to machine parts. If you do this, the damage caused can be easily detected.

- Minerals in the water will form a rust-like mixture on the stainless steel grinding disc. This is normal. Do not panic. The stainless steel disc will not be corroded and affect the normal operation of the machine.

Garbage disposers are a convenient kitchen tool that some people consider to be luxury, while others think they are necessary. These processors can quickly liquefy waste or leftovers in the food preparation process. But if they fail, it can be a big headache because you need to remove all the food before you can repair it.

Fortunately, the garbage processor can be used for many years without major overhaul with a little maintenance. Maintenance is very simple, that is, to ensure that the harmful substances that are not thrown into the garbage processor - grease, large foods, hard foods and fiber-rich foods.
