Sink food waste disposal machine

The leftover residue food, melon skin and fruit chips are placed in a plastic bag and placed in the corner of the room. When it is convenient, take it out. If it is not timely or forgotten to bring out the outdoors, the air that is emitted after the corruption will remain in the room and cause pollution.

After selecting vegetables, washing vegetables, and washing dishes, remove the leftovers and leftovers from the pool and put them into the garbage bag. In this case, some of them leak into the sewers and cause blockages. Cleaning is also quite troublesome. At the same time, if the garbage bags are leaked, the sewage will also pollute the indoor floor and the like.

The sink food waste disposal machine effectively solves this problem that many people worry about.

Product Specification:

Model	SK-9375EG
Product Application	Home Use
Input Power	375W
Horsepower	1/2 HP
Voltage	110V/220 V
Current	2.25A
Frequency	50/60Hz
Rated Rotary Speed	2600/2800RPM
Motor	Permanent Magnetic DC motor
Grinding Capacity	700ML
Grinding System material	Stainless steel
Safety protection	Overcurrent & overload protection
optional sink connector	140mm,160mm,180 mm
ON/OFF	Air Swith
Number of users	2-3 People
Warranty	2 Years
standard life	5 Years
Weight	3.60KG
Product Size	360mm x 135mm

The sink food waste disposal machine consists of an anti-corrosion grinding chamber, an all-stainless steel grinding hammer, and an all-stainless steel grinding disc. It uses a high-speed rotating permanent magnet motor to drive the turntable in the grinding chamber. The food waste collides with each other under the action of centrifugal force for a very short period of time (about 10 seconds), and the food waste is ground into fine particles and discharged along the water. pipeline.

The sink food waste disposal machine is one of the environmentally friendly products for the new home kitchen in the 1990s. It is installed in the bottom outlet of the kitchen sink. It can effectively dispose of various food wastes in the kitchen, such as pork bones and chicken bones, fish bones, egg shells, melon skin, peel core, tea residue, vegetable root leaves, coffee grounds, leftovers, residues, bread crumbs, etc., crushed and ground into a paste-like liquid, naturally discharged through the pipe with water, thus Achieve clean environment, eliminate odor and other effects. It can reduce kitchen odor, reduce pest harassment and promote family health.

FAQ

How long can they be used?

If you use them with correct instructions and prevent from throwing prohibited waste and impacting by hard stuff. The lifespan can be up to 10 years.

.Are your plugs with 3 pin?

Yes. But we can customize the different plugs as per different countries and equipped with motor of correct voltage.

.Is the price different for the disposers with different colors?

Yes. The price will be different with different colors.

.Are there differences among the different colors of disposers?

If they belong to the same series, all the functions are the same except the colors.

However, the function will be different with different series. Please contact our salesmen to solve the confusion for you.

.Can your disposers connect the dishwasher?

Yes,all of them can connect the dishwasher.

Components

With a breakthrough vertical mounting system,
the traditional screw fixing method is
abandoned, no need to use any tools
in installation.

We only need 4 main components to
make the installation more convenient.
