## Kitchen Sink Food Waste Disposal

### What is Food kitchen waste disposer

Food kitchen waste disposer, also known as food waste disposer, kitchen waste disposer, food waste disposer, is installed at the drain of the kitchen sink of the family kitchen, and can easily turn the vegetable head, leftovers, etc. Food-based kitchen waste grinds food waste into fine particles and flows out of the pipeline to prevent the clogging of the water tank and prevent the growth and reproduction of the bacteria, so that you have a clean and warm kitchen.

### Product Details :

Model	SK-9375ES
Product Application	Home Use
Input Power	375W
Horsepower	1/2 HP
Voltage	110V/220V
Current	2.25A
Frequency	50/60Hz
Rated Rotary Speed	2600/2800RPM
Motor	Permanent Magnetic DC motor
Grinding Capacity	700ML
Grinding System material	Stainless steel
Safety protection	Overcurrent & overload protection
optional sink connector	140mm,160mm,180mm
ON/OFF	Air Swith
Number of users	2-3 People
Warranty	2 Years
standard life	5 Years
Weight	3.60KG
Product Size	360mm x 135mm

### Food kitchen waste disposer advantages:

1. Powerful recycling: After the kitchen food waste is disposed of by the kitchen garbage disposer, the pollution of the recyclable garbage is reduced by the non-recyclable garbage, which accelerates its decomposition and recycles, and can promote the recycling of resources to a certain extent.
2. Garbage-friendly recycling: The kitchen garbage disposer can effectively reduce the moisture content of the kitchen domestic garbage, and it has a good preventive effect on the pollution of the container and

the garbage truck. At the same time, it can also avoid the garbage truck. Sewage dripping during transportation pollutes the environment and costs of environmental maintenance

3. Using a small DC or AC motor drive, the blade is rotated, and the residual food can be quickly and effectively pulverized by centrifugation. The pulverized food residue becomes powdery, the size of the particles does not exceed 4 mm, and it is easy to pass through the sewer. Will not cause blockages in the sewer.

4. Kitchen garbage disposer; use the alloy on the crushing disc to crush the garbage by hammering, cutting, tearing and grinding, and automatically adjust the working position according to the strength of the garbage.

5. It can handle kitchen food waste such as bones, fish bones and surplus meals in the kitchen, to prevent the growth and reproduction of bacteria, to protect them from pests such as mosquitoes and flies, to help eliminate the smell of the room and ensure the health of the family.

**How long can they be used?**

If you use them with correct instructions and prevent from throwing prohibited waste and impacting by hard stuff. The lifespan can be up to 10 years.

**.Are your plugs with 3 pin?**

Yes. But we can customize the different plugs as per different countries and equipped with motor of correct voltage.

**.Is the price different for the disposers with different colors?**

Yes. The price will be different with different colors.

**.Are there differences among the different colors of disposers?**

If they belong to the same series, all the functions are the same except the colors.

However, the function will be different with different series. Please contact our salesmen to solve the confusion for you.

**.Can your disposers connect the dishwasher?**

Yes, all of them can connect the dishwasher.

### *Components*

**BMC** grinding technology, abandoned the plastic grinding chamber design applied in other products, using nylon as the primary material for the grinding chamber to reduce the odors arising from residual food.
