Features:

Easy to Inflate and Deflate: The double-decked air valve design can prevent the air leak, easy to inflate it through blowing the air into the top portion of the valve, only 10-15 breaths for sleeping pad . Easy to deflate it by opening the bottom of the valve.

Test:we had some tested friends with weight ranging from 170's to 210 give it a try and it supported every person. We even rolled over on sides to see if hips would push down enough to touch the ground and none did.

Air cell sleep support :a cushioned, 2.5" thick ergonomic sleep pad providing comfort for your neck, back and body. just 10 to 15 breaths will expand this comfortable camping pad to maximum firmness.
