

Lightweight yet strong, aluminum has a naturally-occurring oxide layer that protects the metal from corrosion. This layer can be further strengthened by anodization, providing even greater weather resistance. It also can be powder coated for nice colors.

Item No.	PZ-009
Material	Aluminum Alloy
Accuracy	0.10
Process	Die casting
Finish	Powder coating white
MOQ	1000PCS
Application	Electronic industry

Why Paiyan?

- 1** Reliable Quality
 - Extremely accurate measurements and tolerance
 - Consistent surfaces and colors
 - No need to reworks
- 2** Excellent Service
 - One-stop service
 - Innovative solutions
 - Good English speaking employees
 - Quick response
 - Reliable delivery time
- 3** Wide range
 - Machining-Stainless steel 304/316L
 - Die-casting for Aluminum & Zinc
 - Plastic injection for ABS/PA/POM etc.
 - Rubber-EPDM/Silicone
- 4** Flexible Production
 - Small batch acceptable
 - Lean Production
