

### Application of CNC double servo pump controlled hydraulic press brake

1. All-steel welded structure and stress elimination by vibration with high machine strength and good rigidness.
2. Hydraulic upper transmission, which is stable and reliable.
3. Mechanical stopper and torsion axis synchronization with high accuracy.
4. Electric adjustments for Backgauge distance and ram stroke, manual adjustment, digital display.
5. The upper die is equipped with deflection compensation mechanism.

### Main Features of CNC double servo pump controlled hydraulic press brake

- 1) Control system: Italian ESA, Netherland DELEM, or Swiss CYBELEC.
- 2) Servo motor and drive: Japannese YASKAWA.
- 3) Hydraulic system: HOERBIGER Company or Germany BOSCH
- 4) Ball bearing lead screw: Taiwan HIWIN
- 5) Straight-line guide: Taiwan HIWIM

For the sale of services, the company will be divided into pre-sale and after-sales three parts, the company's service commitment: warranty one year, lifetime service
