

## 1. Description of hydraulic CNC guillotine shears

CNC hydraulic guillotine shears are general use of general or special computer to achieve digital program control, it is usually control the position, angle, speed and other mechanical quantity and mechanical energy flow related to the switch quantity

## 2. Features of Hydraulic CNC guillotine shears

1. Hydraulic transmission, swing type knife rest, the whole frame is solidly welded and durable, the return trip is smooth and fast by using accumulator cylinder.
2. With stepless adjustment stroke function, the upper knife has two blade, lower knife has four blade, upper and lower blade gap is adjusted by handle, blade gap uniformity is easy to adjust.
3. Protective grid and electrical interlock ensure safe operation
4. CNC system and position encoder constitute closed-loop control system, fast speed, high precision, good stability.

## Warranty and service:

- one year warranty for whole press.
- all spare parts are available as we produce most of the parts in our factory.
- it is easy to get the electric parts as all are international famous brands.
- we can provide technical support via email, phone or video.
- we can send out engineers for service, installation or training with reasonable additional cost.
- English operation and maintenance manual is provided with the press.
- All safety warning tags and control panels are in English.
