

Door Type Hydraulic Press

The whole frame hydraulic press is suitable for thermoplastic composite materials molding, can be widely used in ships, automobiles, construction and petrochemical, energy building materials, Electrical appliances, electronic communications, rail transit, aerospace and other fields. The main hydraulic cylinder adopts multi-cylinder layout to make the uniform working force and can be configured according to customer needs, ejector cylinder, hydraulic cushion and other components.

Why choose us?

Non-standard customized short cycle

1. Introducing German FESTO technology, we offer a full range of customized services
2. Parfit has a variety of processing equipment, efficient and fast production, and stable performance
3. The company strictly implements ISO9001 quality standard, use ERP management system, batch spare parts, responds to orders at any time, and effectively carries out production progress tracking and quality control

Details determine quality

1. The casting surface has undergone strict fine boring, fine grinding and fine milling, and the accuracy of the hydraulic press has been improved 20%
2. Create the first hydraulic cylinder three-layer welding process, hydraulic cylinder life increased by 1.3 times
3. The hydraulic cylinder is processed by CNC lathe, with high smoothness and better sealing performance
4. All parfit hydraulic presses are tested for 12 hours fatigue resistance
