Instructions for use

1. Please thoroughly clean the inside of the container lid and the inside and outside of the container for preheating or pre-cooling (fill with hot or cold water, cover the lid for 5~10 minutes, pour off the water in the container), and keep the heat preservation effect better.
2. The bottle liner should avoid severe vibration, and the bottom tail pipe must not be damaged, otherwise the heat preservation performance will be lost.
3. When purchasing the bottle liner assembly, do not force the bottle liner into the shell; check that the bottom bottom screw is flat and well, and tighten the bottle when tightening the bottle.
- 4, placed in a place where children can not touch, so as not to burn.

Why choose us?

1. We are the only manufacturer in China that is still producing glass liners for insulated lunch boxes.
 2. Glass material insulation thermos bottle liner is more environmentally friendly and safer than stainless steel liner, and will not decompose harmful substances.
 3. The company supports customizing various types of glass liners.
 4. It can provide three kinds of environmental protection grades of medium and high temperature, which meet the import standards of any country in the world.
- orld.
