

The solar lawn lamp is mainly used for lighting effects. It has low viewing appearance and can be used in a wide range. The LED lawn lamp has both lighting function and decorative function. It is suitable for every corner of the living space, and plays an important role in embellishment and illumination. It seems that LED lawn light has a decorative landscaping effect in PK.

Solar lawn light is a green energy source that converts solar energy into electric energy. LED lawn light is also a product of green lighting. The difference is that the LED lawn light is broken. He can change it at any time. If the solar lawn is bad, the system circuit of the word will be Will not work, you have to change the whole to use, so the cost will be very high, you have to think about money, you choose solar lawn lights, the cost will be higher. Finally, compared to their longevity, the solar lawn lamp does not have a long service life of the LED lawn lamp, because the LED lawn lamp has good heat dissipation in the lamp body, and the light decay rate is low, but the time for the lawn light is too short, he wants to put the solar energy Conversion use, his cooling effect is not so good, easy to light decay, so in this regard LED lawn lights win again.
