## What is a disposable vape?

A disposable vape that comes ready to vape and is thrown away once it runs out of charge or e-liquid. ... Disposables are designed to be used and thrown away once the e-liquid has run dry. They don't need to be refilled and they can't be charged. Simply use them and dispose of them.

## How do disposable Vapes work?

How do disposable vape work? ... Inside the disposable is a battery, atomizer, and the flavor cartridge, which contains liquid. When a user inhales on the mouthpiece, the battery activates the atomizer, which heats up the liquid and turns it into a vapor.

## Can I refill a disposable vape pen?

Battery isn't reusable, and the entire pen must be thrown away; this creates more waste, though some disposable vape pen brands have recycling programs. So customers can bring back used pens to the dispensary where they purchased it from

## About Us
