## Applications

Our products are used in many fields, petroleum, chemicals, machinery, metallurgy, water treatment, pharmaceutical, marine, HVAC, machinery, etc.

>>> the internationally first-class parts are used to ensure the highly efficient and reliable operation under the most severe working conditions

### Protection level up to IP67

By improving the concave and convex structure of the upper and lower cap binding surface of the product, the sealing is more reliable.

### Transmission part is more reasonable and reliable

- 1.The gear box is made of aluminum alloy to avoid the cracking problem of gear box .
- 2.Gear with 40 chromium steel treated by finishing the two heat, It is more solid and reliable, wear resistance and fatigue resistance is stronger.

### Lower motor temperature

By increasing the size of the motor, under the same power, reducing the capacitance and starting current, thereby reducing the degree of fever.

### Quicker and easier adjustment

By improving the electrical cam structure, integrate the four cam into two, isolated with butterfly spring, pressed with locking nut above. Limit can remain stable at ultra high and low temperature.

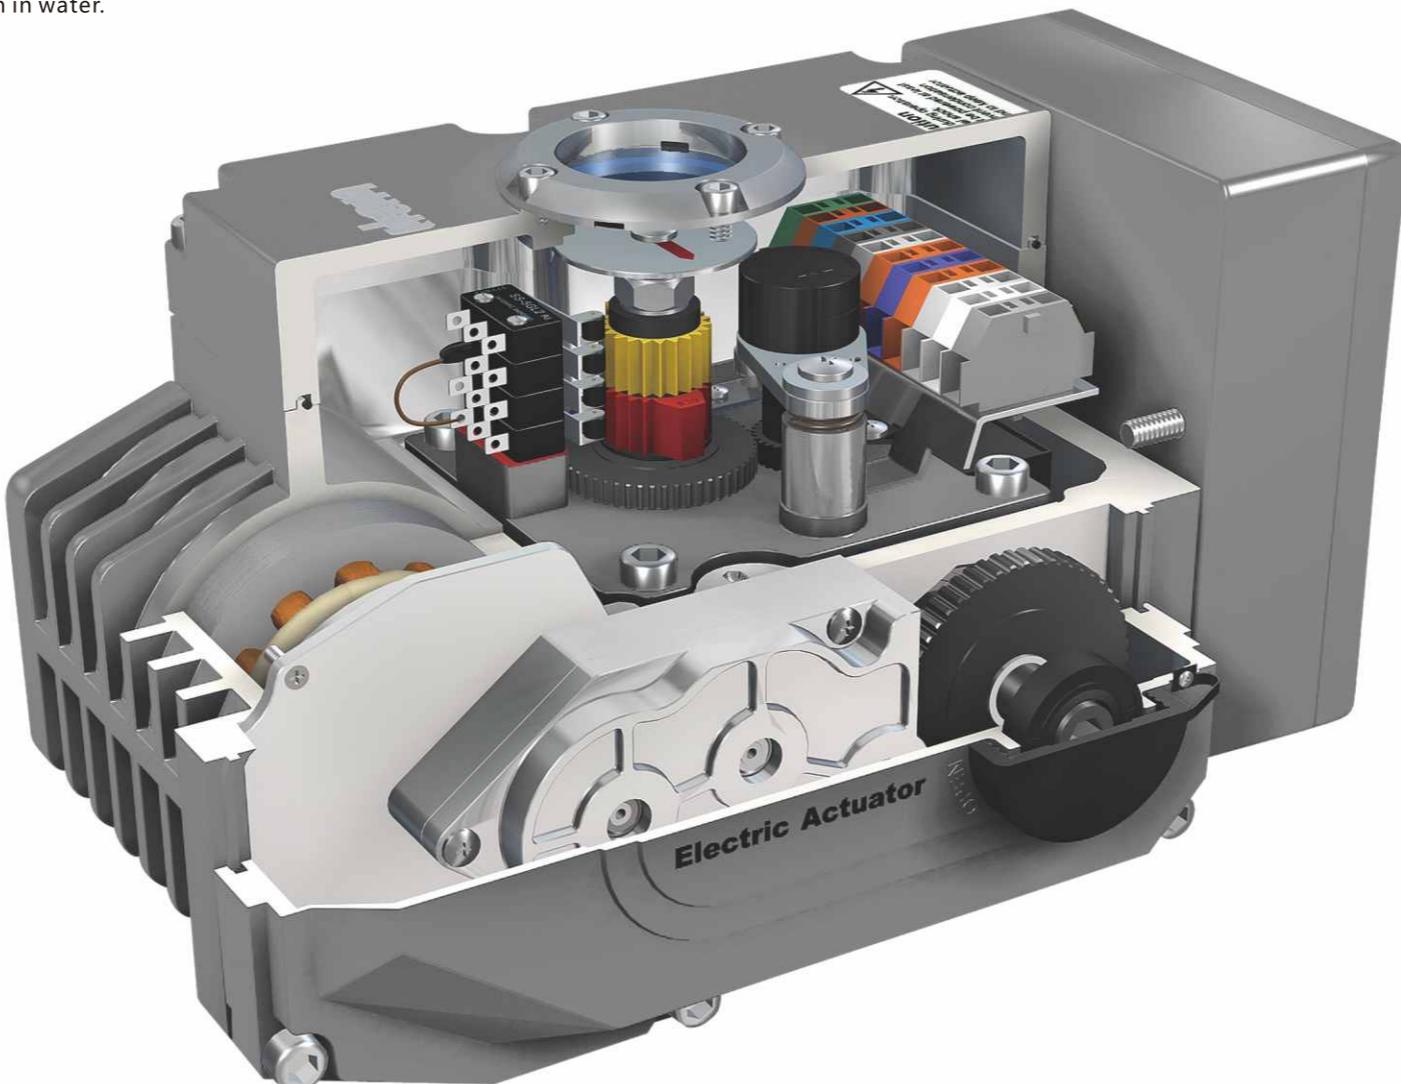

### Lens structure

The mechanical seal structure, avoid the use of chemical adhesives for site conditions due to the aging water.The improved products in full compliance outdoor use conditions, even can be used for short time immersion in water.

### The new appearance, more upscale

Avoiding the monotony of appearance, more attractive.

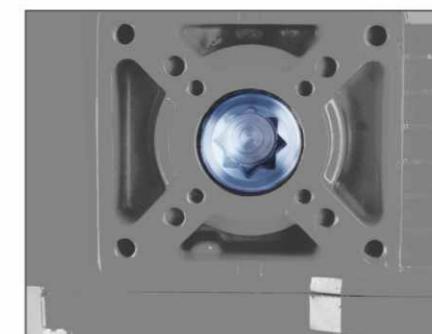

### Modulating type is more stable and reliable

- 1.Increase the size of the module,larger component selection,higher power.
- 2.Using of weak control power supply, field voltage instability will not affect the quality of the module;
- 3.Using the bare board for better heat dissipation;
- 4.Smart setting,one key location, avoiding debugging disorder because of too many keys ;
- 5.Using outboard installation of smart module to solve the contradiction of actuator maximum temperature is 120 °C, electronic components and modules use temperature is only 65 °C.

### Easy to keep manual handle

Position the handle clamp above the mechanical limit screw, so that the wrench is not easy to be lost in the site.

## SUMMARY

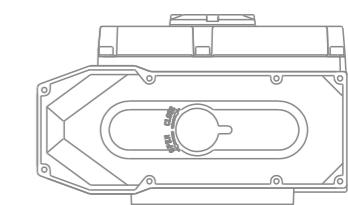

"AOX-R" series electric actuator is used for controlling  $0^\circ \sim 270^\circ$  rotation valves and other similar products, such as butterfly valve, ball valve, damper, flapper valve, cock valve etc. It widely applies to petroleum, chemical, watertreatment, shipping, paper making, power plant, heating, light industry and other industries. Driven by 380V/220V/110VAC or 24V/110VDC power, input 4-20mA or 0-10VDC control signal, moves valve to the right position, and achieves to automatic control, the maximum output torque is 5000N·M.

## PERFORMANCE FEATURES

1. Shell--The shell is made of aluminum alloy, with anodic oxidation treatment and polyester powder coating. It is strong corrosion-resistant and enclosure IP67, NEMA 4 and 6, IP68 is optional.
2. Motor--Fully enclosed squirrel-cage asynchronous motor, small, large torque, and small inertia force, F-class insulation rating, with thermal protection to avoid damaging.
3. Manual Structure--The design of handle is safe, reliable, labor-saving, small. If without power, operated by handle.
4. Indicator--Installs indicator in the center shaft and adopts convex mirror design, no cumulate water, more convenient to observe.
5. Space heater--It is used for controlling temperature to avoid condensing internal of housing and keep dry.
6. Sealing--Well sealing performance and enclosure IP67, IP68 is optional.
7. Limit switch--Mechanical, electronic double limit. Mechanical limit stopper are adjustable, safe and reliable; electronic limit switch is controlled by cam. Set position accurately and conveniently, and not affected by excessive handle.
8. Self-locking--Accurate worm and worm gear transfer large torque efficiently, high efficiency, low noise (max. 50 dB), long life, with self-locking, prevent inversion, as stable and reliable transmission parts, no need to refuel.
9. Anti-off bolt--The bolt attaches to the shell and be not off when remove the shell.
10. Installation--The installation size meets international standard ISO5211 / DIN3337.
11. Circuit--Controlling circuit meets the single-phase or three-phase power supply standard, circuit layout is reasonable and compact, terminals meet various of additional functional requirements effectively.
