

Bowl Shape Electroplated Diamond Grinding Wheel For Carbide

Bowl shape electroplated diamond grinding wheel is widely used for grinding hard-alloy carbide tools, bearings, mold, precision ceramics, polycrystalline diamond, medical, cosmetic, aviation, automobile, electron optics, semiconductor, jewelry, ceramics, glass, stone, shoes, furniture, tools, circuit boards and other manufacturing industries. Welcome to buy bowl shape electroplated diamond grinding wheel for carbide from us.

China Bowl Shape Electroplated Diamond Grinding Wheel For Carbide Manufacturers with Free Sample

Bowl shape electroplated diamond grinding wheel is widely used for grinding hard-alloy carbide tools, bearings, mold, precision ceramics, polycrystalline diamond, medical, cosmetic, aviation, automobile, electron optics, semiconductor, jewelry, ceramics, glass, stone, shoes, furniture, tools, circuit boards and other manufacturing industries.

Specification of bowl shape electroplated diamond grinding wheel for carbide:

Shape: Bowl
Grinding Material: Diamond
Anchoring Agent: Electroplate
Diameter: 100mm
Edge width: 10mm
Bore Diameter: 20mm
Thickness: 35mm

Features of bowl shape electroplated diamond grinding wheel for carbide:

Good self-sharpening, grinding heat a small, not easy to plug, reducing the phenomenon of grinding work burns, high grinding efficiency, smooth, no broken edges, will not produce tremor
