

### **cup&ring type grinding wheel**

As a professional parallel grinding wheel manufactures, You can rest assured to buy parallel grinding wheel from our factory and we will offer you the best after-sale service and timely delivery.

### **Buy China Customized Cup&ring Type Grinding Wheel In Stock**

cup&ring type grinding wheel used in air-conditioning compressor spare parts: cylinder block (gray cast iron or ductile iron), roller sleeve (alloy cast iron), sliding vane (high-speed steel); hydraulic parts; vane pump blades (high-speed steel); carbide tools , Blade (YG cemented carbide); magnetic materials; soft ferrite magnetic materials, etc.

Grinding disc diameter range  $\phi$  250mm— $\phi$  1200mm, specifications can be customized | Machining workpiece parallelism, flatness  $\leq$  0.003mm, and good stability | Machining workpiece surface quality

is good, | Rough grinding and semi-finishing grinding of double-end or single-end grinding  
Process|High durability and long service life.

Ceramic end face grinding wheel is a grinding tool on plane processing machine tool, which is widely used in auto parts, bearings, magnetic materials, ceramics and other industries. It is equipped with CNC double-end grinders such as Peter Wolters, South Korea AM and domestic Henan Xinji.

Ceramic end-face grinding can be divided into CBN end-face grinding and diamond end-face grinding according to the different types of abrasives.

CBN end face grinding is suitable for end face grinding of automobile steering pump rotor and stator, and end face grinding of rotary vane compressor rotor and stator. It is also suitable for cylinder block, valve plate, sliding vane, connecting rod, oil distribution plate, blade, etc. Grinding of both ends of flat workpieces.

Diamond end grinding is suitable for double-end grinding of flat workpieces such as ceramics, monocrystalline silicon, and magnetic materials.

Vitrified bond diamond (or CBN) grinding wheel has more and more obvious advantages in the grinding of some special materials such as ceramics, and has a good prospect in the development of diamond grinding wheels. It is considered to be a high-performance grinding wheel with high speed, high efficiency, high precision, low grinding cost and low environmental pollution, and it has more and more extensive applications.

We constantly stick to the theory "Quality To start with, Prestige Supreme". We have been fully committed to offering our consumers with competitively priced quality products and solutions, prompt delivery and qualified service for Super Purchasing for China Eco-Friendly Bamboo Fiber Coffee Cup with Sugarcane Bamboo Fiber Cup Lids, To offer prospects with great equipment and solutions, and frequently develop new machine is our company's business objectives. We glance ahead for your cooperation. Super Purchasing for China Bamboo Fiber Coffee Cup and Disposable Bamboo Fiber Cup price, Our organization. Situated inside the national civilized cities, the visitors is very easy, unique geographical and economic situations. We pursue a "people-oriented, meticulous manufacturing, brainstorm, construct brilliant" organization. hilosophy. Strict top quality management, fantastic service, reasonable cost in Myanmar is our stand on the premise of competition. If vital, welcome to make contact with us by our web page or telephone consultation, we're planning to be happy to serve you.
