

Diamond polishing wheel

As a professional Diamond polishing wheel manufactures, You can rest assured to buy Diamond polishing wheel from our factory and we will offer you the best after-sale service and timely delivery.

Buy Diamond polishing wheel with Free Sample from China

1. Characteristics of Diamond polishing wheel:

Diamond polishing wheels have high strength and heat resistance in the grinding of some special materials such as diamond, industrial ceramics, diamond composites, diamond polycrystalline, diamond tools, cubic boron nitride, cemented carbide and other high-hard and brittle materials. Good, sharp cutting, high grinding efficiency, not easy to generate heat and blockage during grinding, small thermal expansion, easy to control machining accuracy. Compared with the resin bond diamond grinding wheel, it solves the low life of the resin diamond grinding wheel, low grinding efficiency, high precision of the ground workpiece, good surface quality, and good shape retention of the workpiece. It has Good prospects. It is considered to be a high-performance abrasive tool with high speed, high efficiency, high precision, low grinding cost and low environmental pollution. It has more and more extensive applications and is a hot spot in the research and development of grinding tools in recent countries.

Our organization aims to operating faithfully, serving to all of our consumers , and working in new technology and new machine continually for PriceList for China Granite Marble Sintered Polishing Wheel Diamond Stone Edge Profiling Wheel, We focus on to make exceptional excellent products and solutions to provide assistance for our purchasers to determine long-term win-win partnership. PriceList for China Diamond Milling Wheel, Granite Diamond Milling Wheel, If any item be of interest

to you, be sure to allow us to know. We'll try our best to satisfy your requirements with high quality merchandise, the best prices and prompt delivery. Remember to feel free to contact us at any time. We'll reply you when we receive your inquiries. Please note that samples are available before we start our business. 2. Advantages of ceramic diamond grinding wheel:

1. High grinding efficiency;
2. It has high wear resistance (high wear resistance of the grinding wheel, low abrasive consumption, especially when grinding hard and brittle workpieces);
3. Small grinding force and low grinding temperature;
4. The ground workpiece has high precision, good surface quality and good shape retention.
