

Diamond Rotary Dresser For Gear

Diamond rotary dresser for gear grinding machine. The type diamond roller is used on the gear grinding machine.

Dressing for the ordinary ceramic grinding wheel or CBN grinding wheel.

After the grinding wheel is formed, then grind the workpieces. Make the contour, the accuracy and size to be copied to the surface of the machined parts.

Compared with the traditional single point diamond dresser's trimming,

The efficiency of production has been greatly improved.

The surface quality and accuracy of the parts processed are even higher.

It is especially suitable for high precision and mass production.

China Discount 1EE1 Diamond Grinding Wheel Quotation

1EE1 diamond grinding wheel is a type of abrasive wheel with Sharp edge, which is suitable for grinding V groove, shaping, and cutting. The material can be synthetic as well as CBN(Cubic Boron Nitride), shape and size can be customized. There is a wide range of grit for option.
