

Metal Bond Cutting Disc

Metal Bond Cutting Disc, Cutting Wheels are mainly used for grooving and cutting with high accuracy and slight cutting depth.

Buy Wholesale Metal Bond Cutting Disc from China Factory

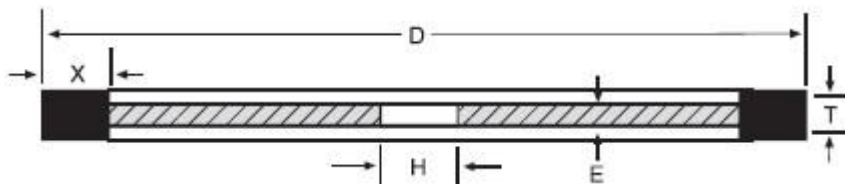

Metal Bond Cutting Disc, Cutting Wheels have high retaining force, higher wear-resistance and advanced cutting capability and higher stiffness. The metal bond blades can effectively reduce cutting defects like slanted kerf.

Application of Metal Bond Cutting Disc, Cutting Wheels

Diamond Cutting Discs are used for grooving and cutting carbide, optics glass, sapphire, ceramics, magnetic materials and semiconductor material.

CBN cutting wheels are used for grooving and cutting tool steel, mould steel, bearing steel, cast iron and other ferrous metal materials.

Specification of Metal Bond Cutting Disc, Cutting Wheels

Diameter : 50 - 400 mm

Thickness : 0.2 -2.0 mm

Hole : 12.7, 19.05, 20, 31.75, 50.8, 60, 127
