

### Resin bond diamond wheel for glass edge grinding

The following is about Resin bond diamond wheel for glass edge grinding related, I hope to help you better understand Resin bond diamond wheel for glass edge grinding. Welcome new and old customers to continue to cooperate with us to create a better future together!

### China Resin bond diamond wheel for glass edge grinding Manufacturers and Suppliers

Features of Resin bond diamond wheel for glass edge grinding

providing sharp and lasting grinding performance and keep the shape of wheel groove intact for longer time

High efficiency of grinding, no broken or burned out

Excellent wear-resistance ability

Wide adaptability for various types of glass edge

3.applications of Resin bond diamond wheel for glass edge grinding

suitable for the straight edge machine and the bilateral machine on the market

4.details of Resin bond diamond wheel for glass edge grinding

5. specifications of Resin bond diamond wheel for glass edge grinding

Abrasive: Diamond

Bonding agent: Resin/Bronze

bronze wheel	Diameter	Height	Width	Hole(customized)	Grit(customized)	Type
	100	8	5	22	240	t4
	130	10	8	12	240	cup
	150	10	8	12	240	t3
	150	7	5	22	240	r3
	175	7	5	22	240	t3

resin wheel	Diameter	Height	Width	Hole(customized)	Grit(customized)	Type
	130	12	15	12	240	cup
	150	12	15	12	240	cup

grinding head  
35\*22\*r5  
50\*22\*t4

6. advantages of Resin bond diamond wheel for glass edge grinding

better wear resistance,

long service life

can grind glass with a variety of thickness
