

Vitrified CBN Surface Grinding Wheel

Vitrified CBN surface grinding wheel is used for grinding the end face, piston ring, gasket, filling piece, compressor part, semiconductor material, magnetic material, cutter, the stator of vane pump, rotor, blade end, precision spring, etc.

China Vitrified CBN Surface Grinding Wheel Manufacturers and Suppliers

Vitrified CBN surface grinding wheel is used for grinding the end face, piston ring, gasket, filling piece, compressor part, semiconductor material, magnetic material, cutter, the stator of a vane pump, rotor, blade end, precision spring, etc. To meet the customers' over-expected pleasure, we have now our solid crew to supply our greatest all round assistance which includes marketing, sales, planning, production, top quality controlling, packing, warehousing and logistics for Supply OEM/ODM China Resin Bond Superhard Material Products Diamond Grinding Wheel for Sharpening Tungsten Carbide, We welcome new and aged buyers from all walks of lifestyle to call us for foreseeable future business associations and reach mutual results! Supply OEM/ODM China End Grinding Disc, Grinding Disc, Over the years, with high-quality solutions, first-class service, ultra-low prices we win the trust and favor of customers. Nowadays our merchandise sell all over the domestic and abroad. Thanks for the regular and new customers support. We present high quality product and competitive price, welcome the regular and new customers cooperate with us!

Item name: Vitrified CBN surface grinding wheel

Abrasive: CBN

Model Number: 6A2

Bond: Vitrified

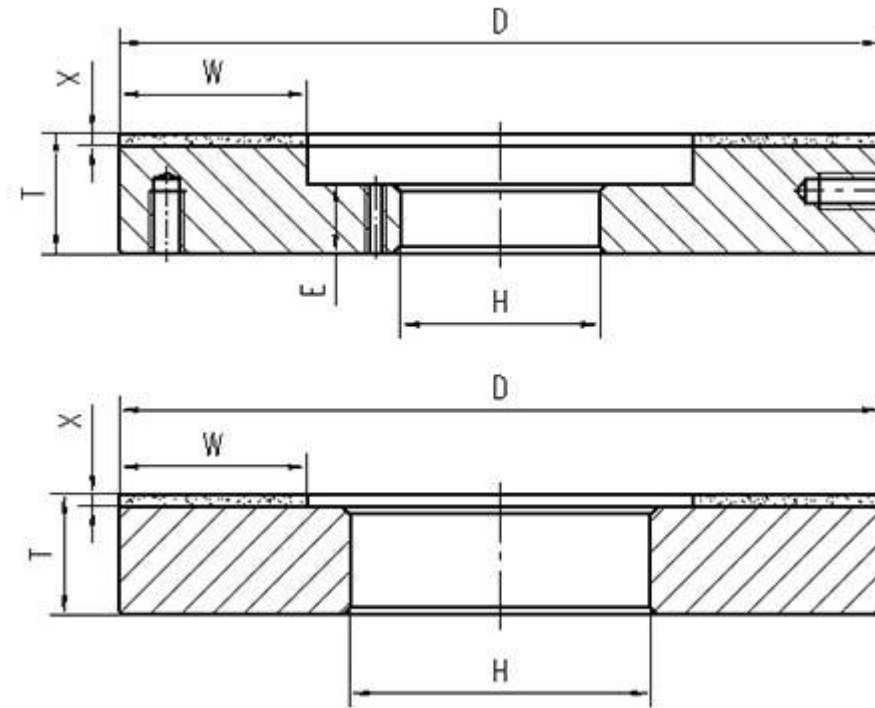

Body: aluminum

Diameter(D): 350/370/500/700/900/1200

Thickness(T): 40/50/60

Center Hole(H): 125/300

Grit: 80#/150#/240#/320#

Features:

1. Large amount of grinding;
2. High wear resistance;
3. Good self-sharpening ability.
4. High grinding ratio;
5. Need sufficient supply of coolant in the grinding.
6. In large scale production, usually use the diamond rotary dresser for dressing
