

## Control System Of Concrete Mixing Equipment

LUCHEN® Control system of concrete mixing equipment computer network and computer automatic control technology are adopted to realize network monitoring and automatic control and standardize the practice and Control system of concrete mixing equipment control of the whole process of concrete production. As the professional manufacture, we would like to provide you Control System Of Concrete Mixing Equipment. And we will offer you the best after-sale service and timely delivery.

### Product Description

Control system of concrete mixing equipment from China factory computer network and computer automatic control technology are adopted to realize network monitoring and automatic control and standardize the practice and Control system of concrete mixing equipment control of the whole process of concrete production.

LUCHEN® Control system of concrete mixing equipment dynamic display of metering process and work process, with a graphical interface. Automatic effect scale, automatically correct the drop, automatically remove the tare weight of the scale. "Task list" can be arranged to realize the continuous production of concrete with different mix ratio. Input, call out, modify mix ratio, formula number and control parameters at any time.

Control system of concrete mixing equipment In the process of automatic production, there will be measurement error alarm, tare alarm, proportioning alarm lamp various fault prompts and alarms. In addition to the manual input of sand moisture content to achieve automatic water reduction, such as the selection of water cut meter, can realize the automatic adjustment of water content. Concrete delivery note, single plate and bicycle situation, mix ratio, statistical statement can be realistic, print, query.

LUCHEN® Control system of concrete mixing equipment from China factory can realize the statistical management of raw materials, operators, drivers and other staff of the workload of the staff statistics management. Control system of concrete mixing equipment can realize concrete order cooperation, concrete users, delivery site, vehicle management.
