

Cylinder Stone Washer

LUCHEN® Cylinder Stone Washer from China factory characterized by simple and compact structure, great capacity and sufficient flushing, it is an indispensable supporting equipment for quality concrete production.

Product Description

After being transferred to the feeder by the loader, the raw materials flow through the inclined chute into the cylinder, where the stones move forward due to the continuous rolling and pushing of spiral blades, internal friction and the flushing by continuous water flow at the cylinder bottom until they flow out of the cylinder and are then conveyed by the belt to the center collection location. LUCHEN® Cylinder Stone Washer made in China characterized by simple and compact structure, great capacity and sufficient flushing, it is an indispensable supporting equipment for quality concrete production.

LUCHEN® Cylinder Stone Washer

Technical parameter	Capacity (t/h)	Cylinder speed (r/min)	Drive motor (kw)	Electric cylinder (kw)	Pump motor (kw)	Hopper volume (m ³)	Loading height (mm)	Working size (mm)	Weight (kg)
