

HZS Series Mixing Station

LUCHEN® HZS series mixing station is a complete set of automatic concrete production equipment that is constantly adapted to the needs of modernization and HZS series mixing station suitable for large and medium-sized construction projects such as hydropower, airport, highway, bridge, etc. You can rest assured to buy HZS Series Mixing Station from our factory and we will offer you the best after-sale service and timely delivery.

Product Description

LUCHEN® HZS series mixing station made in China factory is a complete set of automatic concrete production equipment that is constantly adapted to the needs of modernization and HZS series mixing station suitable for large and medium-sized construction projects such as hydropower, airport, highway, bridge, etc.

- 1) The main mixer adopts the double horizontal axis JS series forced mixer with many years of production history in our factory;
- 2) HZS series mixing station with compact structure and flexible layout, the product can be combined designed according to the requirements of the site and users;
- 3) High-precision and low-fault electronic scale measurement system;
- 4) HZS series mixing station has the functions of screen display, matching storage, automatic compensation of drop difference, etc., which can be automatically operated or manually controlled separately.

LUCHEN® HZS Series Mixing Station

Model	HZS25	HZS35	HZS50	HZS75
productivity	25 m ³ /h	35m ³ /h	50m ³ /h	75m ³ /h
Supporting the host	JS500	JS750	JS1000	JS1500
Discharge height	3.8m	3.8m	3.8m	3.8m
Bone bin capacity	3x3m ³	4x4m ³	4x7m ³	4x10m ³
Measuring accuracy of aggregate	±2%	±2%	±2%	±2%
Measuring accuracy of powder	±1%	±1%	±1%	±1%
Water metering accuracy	±1%	±1%	±1%	±1%
Admixture measuring accuracy	±1%	±1%	±1%	±1%
Cement screw conveyer	Φ219	Φ219	Φ219	Φ273
Coal ash screw conveyor	Φ168	Φ168	Φ219	Φ219
The engine power	45kW	65kW	105kW	130kW
The quality of the whole machine does not include the warehouse	11.5t	14.2t	21.5t	24.2t
