

JS Series Mixing Station

LUCHEN® JS series mixing station has the advantages of good mixing quality, high efficiency, low energy consumption, convenient layout and fast erection, etc. It can mix dry and hard concrete, plastic concrete, fluidity concrete, light aggregate concrete and all kinds of mortar, suitable for all kinds of construction projects and commercial concrete factories. As the professional manufacture, we would like to provide you JS Series Mixing Station. And we will offer you the best after-sale service and timely delivery.

Product Description

Concrete mixer JS series mixing station double horizontal shaft made in China forced mixer is the most commonly used concrete mixer in the world. As a result of its shape mixing tank and double horizontal axis mixing form so that it can form two stirring center, and at the junction of the formation of a vortex stirring area so that it can be used in a shorter time to stir out of high quality concrete. LUCHEN® JS series mixing station has the advantages of good mixing quality, high efficiency, low energy consumption, convenient layout and fast erection, etc. It can mix dry and hard concrete, plastic concrete, fluidity concrete, light aggregate concrete and all kinds of mortar, suitable for all kinds of construction projects and commercial concrete factories.

LUCHEM® JS Series Mixing Station

Model	JS500	JS750	JS1000	JS1500
productivity	25 m ³ /h	35m ³ /h	50m ³ /h	75m ³ /h
Feed capacity (L)	800	1200	1600	2400
Discharging capacity (L)	500	750	1000	1500
Maximum particle size of aggregate (mm)	80/60	80/60	80/60	80/60
Mixing blade	2x7	2x7	2x8	2x8
Stirring motor (kW)	18.5	30	2x18.5	2x30
Hopper lifting speed (m/min)	18	20	28	28
Unloading height (mm)	1600/2600/3800	1600/2600/3800	3800	3800
Machine mass (kg)	4000	5500	10000	13500
