It is easy to transport, install and dismantle, and has a long service life. You are welcomed to come to our factory to buy the latest selling, low price, and high-quality SNC Series Bolted Cement Silo. We look forward to cooperating with you.

Product Description

The SNC series bolted cement silo made in China factory is a new type of special silo which is assembled at the site by bolting its modular parts manufactured in the factory and then delivered to the site. It is easy to transport, install and dismantle, and has a long service life. LUCHEN® SNC series bolted cement silo size may be adjusted based on the required storage volume and the need of different materials to reduce volume waste. LUCHEN® SNC series bolted cement silo may be used repeatedly in different site and thus significantly reduces the user's investment.

1. The diameter of the SNC series bolted cement silo can be designed to meet different size requirements and some special needs (such as double-cone, multiple discharge ports and silo spraying).
2. All components of the SNC series bolted cement silo can be sandblasted and shot blasted and have strong anti-corrosion performance. The silo body is assembled with high-strength special bolts, which offers a fine appearance, low maintenance cost and longer service life.
3. Unparalleled transportation convenience and savings: The SNC series bolted cement silo of whatever size may be transported, and multiple silos may be installed at the same time, which greatly reduces the freight.
