

Vehicle washing platform

The LUCHEN® vehicle washing platform is the equipment for complete washing of tires and chassis of various engineering vehicles with high-pressure water jet. Vehicle washing platform may automatically complete the washing and recycle the cleaning water. As the professional manufacture, we would like to provide you Vehicle washing platform. And we will offer you the best after-sale service and timely delivery.

Product Description

The vehicle washing platform made in China is the equipment for complete washing of tires and chassis of various engineering vehicles with high-pressure water jet. LUCHEN® Vehicle washing platform may automatically complete the washing and recycle the cleaning water. It is especially suitable for the cleaning of vehicles driving in and out of various construction sites, mining plants, cement factories, coal mines, power plants, landfills, etc. so as to ensure dust-free excellent projects. Vehicle washing platform has the following advantages:

1. Vehicle washing platform fully automatic, fast (with the time of cleaning adjustable), requiring no manual operation.
2. LUCHEN® Vehicle washing platform energy efficient and environmental friendly; allowing recycling of cleaning water; saving water.
3. Vehicle washing platform with great structural bearing capacity; suitable for various locations.

Technical parameter	Outer dimension (mm)	Loading capacity (t)	Bottom structure	source	Pump power (kW)	Control mode	Induction mode	Number of nozzle holes	Flushing Pressure (kg/cm ²)	Flushing time (s)
LC-XCJ-3	3000*4000*1500	220	80*80 square tube	380v	7.5	Manual/ auto	Infrared induction	200	4-6	0-60 Adjustable
LC-XCJ-6	6000*4000*1500	220	80*80 square tube	380v	2*7.5	Manual/ auto	Infrared induction	400	4-6	0-60 Adjustable
