

Automatic Mask Machine (one for two)

The following is about China Waimaoni Import and Export® Automatic Mask Machine (one for two) related, I hope to help you better understand Automatic Mask Machine (one for two).

Product Introduction

Buy Waimaoni Import and Export® Automatic mask machine (one for two) which Can be Customized From Our Factory in China

During the past few years, our business absorbed and digested state-of-the-art technologies the two at home and abroad. Meanwhile, our firm staffs a group of experts devoted to your development of Bottom price China Automatic Mask Machine, Adhering to your small business principle of mutual positive aspects, we have now won superior popularity among our customers because of our best solutions, excellent products and competitive selling prices. We warmly welcome clients from your home and overseas to cooperate with us for common achievement. Bottom price China Face Mask Machine, Face Mask Making Machine, Our company will continue to serve customers with best quality, competitive price and timely delivery & the best payment term! We sincerely welcome friends from all over the world to visit & cooperate with us and enlarge our business. If you are interested in our merchandise, remember to do not hesitate to contact us, we'll be happy to offer you with further information!

Fully automated production process, two output lines, high output

Waimaoni Import and Export® Automatic mask machine (one for two) product introduction

Fully automatic mask machine (one for two), using servo and constant temperature control system to control the material from entering → forming → welding → punching through PL program control. The entire production process is fully automated. Product features of the mask machine The mask machine is a process of manufacturing a variety of masks with constant filtration performance through processes such as hot-pressed folding molding, ultrasonic welding, scrap removal, and welding of earband nose bridge strips. Its production rate of masks is 110 pieces / min and above, and the pass rate is over 98%, which can more than double the production efficiency of similar products.

**Fully automatic mask machine (one for two) -Product advantage**

1. The servo and constant temperature control system adopted is controlled by PLC program to make the material from entering → forming → welding → punching in one time, and the entire production process is fully automated
2. Intelligent control platform, easy to learn and operate, only one person can operate;
- 3, high production stability, two output lines at the same time to significantly increase production;
4. The production speed of masks is 110 pieces / min and above, and the qualified rate is above 98%.

**Full automatic mask machine (one for two) -Product parameters**

Power 19KW

Efficiency: 110 pcs / min

Machine size 7000 * 2700 * 2000mm

Power 220V
