When the water tank is empty, the steamer will automatically shut off, preventing the unit from overheating.

4.FAQ

Question:Is it safe to use bleach or disinfectant solution with water in the reservoir to disinfectant the clothes?

Answer:You would be better off washing & drying your clothes rather than using bleach. Bleach could damage coloration of clothes & I am not sure how dangerous it would be to inhale vapors.

Question:Can tap water be used or should bottled distilled water be used?

Answer:It is always best to use distilled water. Tap water while tasting fine and looking fine, may include some mineral elements that when turned to steam, may discolor clothing. Most likely it will not but it is always best to play it safe

Question:How do you open the water tank?

Answer:At the bottom right under the water tank (the white area like the rest of the device), there is a small button on each side. They are reachable with one hand while taking out the water tank.
