

### **1, where do you want to use the greenhouse?**

**Customers Answer Sample:** we are looking for a green house to use in the tropical climate with high relative humidity.

### **2, what's the temperature in winter and summer in your place?**

**Customers Answer Sample:** We do not have winter we are the tropics. I will be able to send you a chart with the relative humidities and temperature

### **3, what temperature would you like in the greenhouse?**

**Customers Answer Sample:** I would like temp that can range from 19 C to 26 C if possible. will be able to use dehumidifier combine with cooling

### **4, what's the size of greenhouse? (length/width/height)**

**Customers Answer Sample:** start looking for 5,000 square meters maximum height 5.5 m. Or your best advice could be a gable venlo type

### **5, what do you want to add any option system in greenhouse?**

**Customers Answer Sample:**

We have

- **inner sunshade**

Yes if possible

- **outer sunshade**

- **heating**

No

- **cooling**

Yes

- **ventilation**

Yes dehumidifier and cooling

- **irrigation**

not sure

- **lighting**

nope or not sure depending on price

- **hydroponics**

we are looking and talking to company for a hybrid floating raft system

these system for you to choose.

### **6, What's the usage of greenhouse? We'll make some suggestions according to different usages.**

**Customers Answer Sample:** lettuce

### **7, What covering material of greenhouse you'd like? We have poly-carbonate, LDPE film for your choose.**

**Customers Answer Sample:** Poly-carbonate anyway a material that is good for the tropics if you to have a membrane like material
