

Owl Rotary Cander Holder

Kingnero is a factory-sold owl carousel rotary candle holder. The product materials are all precision processed with stainless steel materials. The appearance of each accessory is high-grade electroplating treatment, which can keep it permanently bright as new and never rust.

Kingnero is a factory-sold owl carousel rotary candle holder. The product materials are all precision processed with stainless steel materials. The appearance of each accessory is high-grade electroplating treatment, which can keep it permanently bright as new and never rust.

The main feature of our candle is that when you light the candle, the rising of the red heat drives the turbine at the top to rotate rapidly, which can make the owl pendant move without any power decoration.

When the carousel candlestick is working, the candlelight is reflected around the room through the bright surface of the owl. The rotating candlestick is extremely cute and an ideal product for creating a romantic atmosphere.

This windmill candle tealight holder is an ideal choice for home decoration, suitable for various indoor occasions, such as bedroom, living room, shopping mall, window, restaurant, hotel, club, studio, party, birthday party, wedding, Christmas, etc. .

Our candle holder can also be used as an interior decoration during the day, and it will rotate quickly when the wind blows. It can also be given as a holiday gift to friends and family. It is a product that you can like at any time.
