

## Rotary Candle Holder Snowflake

The kingnero Christmas snowflake carousel rotary candle holder is made of stainless steel with precision processing. Each part of the product is processed by high-grade silver electroplating, which can keep it permanently bright as new for a long time without rusting.

The kingnero Christmas snowflake carousel rotary candle holder is made of stainless steel with precision processing. Each part of the product is processed by high-grade silver electroplating, which can keep it permanently bright as new for a long time without rusting.

The main feature of the Snowflake Rotating Candle Holder is that when you light the candle, the rising heat urges the turbine at the top to rotate. It is an ornamental candle holder that can be rotated without any power decoration.

When the snowflake carousel candlestick rotates, the warm candlelight is dynamically reflected around the room through the bright surface of the owl. The candlelight rotates happily in the room, which is the best product to create a romantic atmosphere.

This snowflake windmill spinning candle holder is an ideal product for home decoration, suitable for bedrooms, living rooms, shopping malls, showcases, restaurants, hotels, clubs, studios, parties, birthday parties, weddings, Christmas and other occasions.

Our snowflake candle holder can also be used as an interior decoration during the day, and the snowflakes will rotate quickly when the wind blows. It can also be used as a holiday gift to friends and family, which can be suitable for any time and season
