

Rotary Candleholder

Our carousel rotating candle holder is made of stainless steel, and the outside is treated with high-grade electroplating, which can last for a long time without rusting.

Our carousel rotating candle holder is made of stainless steel, and the outside is treated with high-grade electroplating, which can last for a long time without rusting.

This rotary tea light candle holder is composed of exquisite metal patterns and glass cups. The top of the candle cup is supported by a turbine supported by a pole. After the candle is lit, the heat rises to promote the continuous rotation of the turbine.

After the hot rotating tea light candle holder is lit, the warm candle holder spreads over the entire room, and the rotating candle light happily jumps in the room, allowing you to have a good night.

This spinning candle holder is suitable for many occasions, such as bedroom, dining room, living room, study room, shopping mall, club, holiday party, wedding, various parties and so on.

Reminder: After the candle has been used, if you need to move it, please touch the candle cup below, and touch the pole, turbine and pendant above with your hands, because the rising heat will make the upper part of the candle holder very hot, it will be hot to your hands, need to cool for 15 minutes before touching.
