### **Upgraded Hanger Type Shot Blast Machine**

This's a Upgraded Hanger Type Shot Blast Machine, no electric hoist, no control device for hook forward-back, so no tanglesome wires and looks very neat

### **Upgraded Hanger Type Shot Blast Machine Made in China**

This's a Upgraded Hanger Type Shot Blast Machine, no electric hoist, no control device for hook forward-back, so no tanglesome wires and looks very neat. You can find the merit as following pictures A and B. Based on the design, the Upgraded Hanger Type Shot Blast Machine is running smoothly and noiseless! And the electrical system is neat, too. And a focus of the hook type shot blating equipment is that it removes two motors than general hook type shot blast equipment, thus decreasing energy consumption, failure rate and servicing cost! So the upgrade hook type shot blaster is your best choice. The hook shot blasting machine have used widely in many countries.

The cabinet of this Upgraded Hanger Type Shot Blast Machine are bended by a whole steel plate, like picture C. It's very strong and neat. We have strong processing capability, bending machine, plasma cutting machine and plate shearing machine, yes, we own do these process.

We're only one to make this hook structure style in China. We designed and manufactured it independently. We name the hook type shot blaster GND-H007. We have many excellent staff members good at marketing, QC, and dealing with kinds of troublesome problem in the production process for Quots for China Taa Brand Overhead Rail Hanger Hook Type Shot Blasting Machine, If needed, welcome to create get hold of with us by our web page or telephone consultation, we're going to be delighted to provide you. Quots for China Shot Blasting Equipment, Shot Blasting Machine, Our qualified engineering team will usually be prepared to serve you for consultation and feedback. We're able to also deliver you with absolutely free samples to meet your needs. Best efforts might be made to offer you the ideal service and goods. For anyone who is interested in our company and

TECHNICAL PARAMETERS:

MODEL: GND-H007

workpiece size	diameter gyration $\Phi$ 700mm, high 1200mm	
inside size of blastroom	L1380*W1395*H1750mm	
Max. loading weight of each hook	$\leq$ 500kg	
blasting cycle	3-10min	
blastwheel	QTY.	2pcs
	motor	7.5kw (direct-drive)
abrasive feeding valve	air control valve	
abrasive Qty. for first time	0.5t	
dust collector	cartridge filter	
total power	22.62kw
