4 Qualification of Acoustic Fabric

We have 7 modern workshops and production line, with patent technology to make the stable products. Qdboss produces flame retardant Acoustic Fabric, fabric wrapped fiberglass acoustic panel, fiberglass acoustic ceiling. We have different production lines for different method of flame retardant process, such as carton coating process, flame retardant soaking process, fiberglass fabric process, to meet the different requirements from the clients.

5 How do the flame retardant fabric work?

The common fabric is not flame retardant, we can make it flame retardant by some further process, such as soaking in chemicals, FR yarn, and carbon coating. In practice, activated-carbon coating is the most advisable choice. The main component is graphite, which is flame-retardant. Graphene is a key national support project. The expansion rate of graphite is 300, which can expand instantly when exposed to high temperatures, preventing oxygen from contacting textiles, smoking and reducing smoke density. Carbonized in fire, no dripping, environmentally friendly flame retardant product

Activated carbon coating foaming machine, uniform coating, good air permeability, impervious to glue
