1. Product Introduction of Acoustic wall tiles

Polyester Fiber Panel is good material for the Acoustic wall tiles it is also called polyester fiber decorative sound-absorbing panel, which is a kind of decorative material with sound-absorbing function made of polyester fiber as raw material by hot pressing and needle punching. The appearance is beautiful and generous, and there is no lack of warm and elegant feeling. This product can not only reduce the noise, but also make the reverberation time reach the acoustic design standard, $NRC > 0.8$, the acoustic adjustment is convenient,

2 .Applications of Acoustic wall tiles

The polyester fiber panel is widely used in the following areas: Cinema, theater, healthcare center, shopping malls, clubs, education room, stadium, home decoration, office, baffle, home theater, meeting room. It can provide a safe, quite and delightful environment for the people inside.

3. The Advantage of Qdboss Acoustic Acoustic wall tiles

Qdboss Acoustic has the patent technology to make the polyester fiber panel flame retardant during production. That's to say, our panel is flame retardant after production. The performance is as good as the panel made of FR fibers, while the cost is half. Unlike the old socking method, we can arrange

the shipment as soon as the production. More environment friends, no smell, not sticker or wet on the surface.

4. Qualification of Acoustic wall tiles

We have 7 modern workshops and production line, with patent technology to make the stable products. Qdboss produces flame retardant Acoustic wall tiles, fabric wrapped fiberglass acoustic panel, fiberglass acoustic ceiling.

5 Loading Quantity of Acoustic wall tiles

The full size polyester panel can be loaded 800 pieces in 20ft container.

The full size polyester panel can be loaded 1600 pieces in 40ft GP container.

The full size polyester panel can be loaded 1900 pieces in 40ft HC container.

And more quantity can be loaded if the polyester panel is cut to small sizes.

6 How to Install Acoustic wall tiles

1. Before construction, you need to pay attention to the problem of board selection and layout, and you need to pay special attention to the slight color difference. On the side of the paste, find the center and draw the cross line, and the way of scheduling is Similar to the way of laying bricks. However, it should be noted that during the entire process, you need to wear gloves for construction to avoid pollution.

2. When cutting the board, a steel ruler and a utility knife are usually used to better cut and modify the board. If it is necessary to reduce the seam, the blade needs to be inclined by 0.5~1mm, which can effectively reduce the gap.

3. When pasting, you can use white latex or non-intrinsic all-purpose glue, so that it can stick to the cement or wood base more effectively, and it will take longer to use
