measuring time, high measuring precision, memory and Beeper function, so it is especially suitable for family use.

3. How to use Water proof Digital Thermometers?

1. Use alcohol to sterilize the head of sensor before use;
2. Press the power button, pay attention to the notice;
3. The display shows the last result and last 2 seconds, then °C flickers on the screen, which means it is ready to test;
4. Put the head of sensor to test site, temperature rises slowly. If the temperature keeps the same for 16 seconds, °C sign stops to flicker and test finishes;
5. Thermometer would turn off automatically if power off button has not been pressed again.
