

Blended Polyol

Zhongyuan® Blended Polyol is a highly specialized product developed to meet the needs of the applicable market. It is based on one or more polyether (or polyester) polyols, combined with special catalysts, foam stabilizers and foaming Auxiliaries, such as auxiliaries, are processed in the factory through secondary compounding.

High quality Zhongyuan® Blended Polyol is offered by China manufacturer Ningbo Zhongyuan Pigment Co.,Ltd. Buy Blended Polyol which is of high quality directly with low price. We always feel that all success of our company is directly related to the quality of the products we offer.

Blended Polyol summary

China customized Zhongyuan® Blended Polyol of high quality is a highly specialized product developed to meet the needs of the applicable market. It is based on one or more polyether (or polyester) polyols, combined with special catalysts, foam stabilizers and foaming Auxiliaries, such as auxiliaries, are processed in the factory through secondary compounding.

Sticking to the principle of "Super Good quality, Satisfactory service", We are striving to become an excellent organization partner of you for Top Quality China Blend Polyol Discontinuous Sandwich Panel Used for Thermal Insulation Building Material Discontinuous Sandwich Panel, Safety as a result of innovation is our promise to each other. Top Quality China Polyol Discontinuous Sandwich Panel, Discontinuous Sandwich Panel, If you are interested in any of our solutions or would like to discuss a custom order, be sure to feel free to contact us. We're looking forward to forming successful business relationships with new clients around the world in the near future.

We keep on with our business spirit of "Quality, Performance, Innovation and Integrity". We goal to create much more worth for our customers with our rich resources, state-of-the-art machinery, experienced workers and exceptional providers for China wholesale China Blended Polyol, All the time, we have been paying attention on all details to insure each product satisfied by our customers. China wholesale China Polyether Polyol, Blended Polyol, We pursue the management tenet of "Quality is superior, Service is supreme, Reputation is first", and will sincerely create and share success with all clients. We welcome you to contact us for more information and look forward to working with you.

Blended Polyol detail

Blended Polyol is mainly used for specific polyurethane foam products produced by mass machinery. The main components of the Blended Polyol are as follows:

- (1) Polyether (or polyester) polyol are available in a single form or in combination with polyols of various specifications;
- (2) Polymer polyol;
- (3) Crosslinking agent, usually a low molecular glycol;
- (4) Catalysts, mostly compound catalyst systems;
- (5) Blowing agent;
- (6) Foam stabilizer and cell opener;
- (7) Auxiliaries such as anti-aging agent and combustion-supporting agent;
- (8) Color paste, etc. The main raw materials of Blended Polyol are one or more polyols and polymer polyols, which are fed into the mixing kettle in proportion from several storage tanks and metering pumps, under the protection of 40~50°C and dry nitrogen. Stirring, various auxiliary agents are sequentially metered into the mixing kettle through the storage tank and the measuring cylinder, and then put into the adjusting kettle after mixing, and the necessary fine adjustments are made according to the actual needs and the gap of the batch mixing.

Blended Polyol application

Rigid foam, high resilience foam, slow rebound foam etc.

Blended Polyol packing

200kgs/drum
