With this motto in mind, we now have turned out to be amongst quite possibly the most technologically innovative, cost-efficient, and price-competitive manufacturers for Factory Promotional China Modified MDI for Foam Polyurethane. Welcome to develop the effectively and extensive standing business relationships with our business to produce a glorious long run jointly. customers' satisfaction is our everlasting pursuit!

Factory Promotional China Modified MDI for Foam Polyurethane, We provide good quality but unbeatable low price and the best service. Welcome to post your samples and color ring to us. We will produce the goods according to your request. If you are interested in any products we offer, please feel free to contact us directly by mail, fax, telephone or internet. We are here to answer your questions from Monday to Saturday and looking forward to cooperating with you.

Modified MDI for Foam Polyurethane detail

The most commonly used MDI liquefaction technology is to introduce a carbamate or carbodiimide group into 4,4'-MDI to obtain a liquid MDI modified product. In addition, MDI can be made liquid by increasing the ratio of 2,4'-MDI in the MDI manufacturing process (or blending TDI with MDI to form a mixed diisocyanate with a low freezing point.) The principle of various methods is to change the crystallinity of the product by introducing compatible impurities. Crystallization is eliminated at room temperature. Of course, the NCO content of the product has decreased. But it does not change the functionality of the product. The functionality is still 2.
