Elbow Brass Waterproof Cable Gland Feature And Application

Function: Elbow Brass Waterproof Cable Gland can be used in flexible metallic conduit or liquid tight conduit in Power Plant, Power transmission system, communication system, building factory, railway, train, transportation system project, air conditioner, various machines, automates controlling plant. And protecting the electrical wire or cable outside the construction and plant. Elbow Brass Waterproof Cable Gland can be used in flexible metallic conduit or liquid tight conduit in Power plant, Power transmission system, communications system, building factory, railway, train, transportation system project etc.

Jixiang Connector Elbow Brass Waterproof Cable Gland offer good strain relief with the wide clamping range and screwed tightly on the cable assembly to provide high strength connection and installation.

Features of Elbow Brass Waterproof Cable Gland

- Good performance in strain relief
- Oil and Chemical Resistant
- Protects against ingress of water and dust
- Protects and anchors cable at chassis entry
- For application in installation areas with small amounts of space due to construction dimensions

Elbow Brass Waterproof Cable Gland Details

Products: Elbow Brass Waterproof Cable Gland

Thread Size: Metric Thread

Material: Body: brass nickel-plated

Cap nut: brass nickel-plated

Clamping Insert: PA6

Sealing ring: NBR

ring: NBR

Product Certification: CE certification and ISO9001.

Working temperature: -40 °C to 100 °C, short time up to 120 °C.

Elbow Brass Waterproof Cable Gland Qualification

Certificates of Elbow Brass Waterproof Cable Gland: CE, IP68,ISO9001

Deliver,Shipping And Serving

Delivery of Elbow Brass Waterproof Cable Gland Normally 7 working days to 1 month after received the payment.

Cable Glands Recommend

Brass Flexible Cable Gland

JIXIANG CONNECTOR® Brass flexible cable gland may be used on all types of electrical power, control, instrumentation, data and telecommunications cables.
