China High Quality SS304 SS316 Waterproof SS Cable Glands Metric Thread Factory Price

Waterproof SS Cable Glands Introduction

JIXIANG CONNECTOR® Waterproof SS Cable Glands is a kind of connection device often used in power system. It can be mainly applied to outdoor products, medium and large remote control machinery, and some equipment whose main body is in the outdoor control system and not on the main body.

What is SS?

SS means stainless steel. Stainless steels are steels containing at least 10.5% chromium, less than 1.2% carbon and other alloying elements.

JIXIANG CONNECTOR Waterproof SS Cable Glands normally made of stainless steel with a hermetic seal to ensure IP rating up to IP68 and has the advantages of smooth and delicate surface, clear stripes, standard thread, smooth and burr-free, etc.

Waterproof SS Cable Glands Feature And Application

Extremely easy installation, simply insert cable through the assembled gland and tighten gland locknut until cable is secured. These Waterproof SS Cable Glands are designed to withstand water, dust, salt, acid-based, alcohol, oil and common solvent.

If Waterproof SS Cable Glands is used in a slightly humid environment, it is best to wrap waterproof filling tape or shrink protective sleeve on both ends of the cable, and the two ends of the protective sleeve must be glued. If it is used in a relatively harsh environment, self-adhesive waterproof tape must be used to strengthen the waterproof, or heat-shrinkable waterproof tape can be used, which can achieve a good waterproof effect.
