

Hex Socket Head Captive Screw

Hex Socket Head Captive Screw is a type of captive panel screw. The head is a hexagon socket, and its thread has a part at the bottom. We are a professional fastener supplier in China, we have a wide variety of products and different materials for you to choose from. These products are of high quality and low price, you are welcome to choose.

1.Product Introduction

Although Hex Socket Head Captive Screw is a type of Captive Panel Screw, it also has its own characteristics. Its head is a hexagon socket, and the thread has a part at the bottom, so it is often used to fix two panels. Hex Socket Head Captive Panel Screws also offer additional features such as guide points for easy navigation to threaded holes.

2.Product Parameter

| | |
|-------------------|----------------------------------|
| Product Name | Hex Socket Head Captive Screw |
| Material | Alloy, Stainless steel etc. |
| Surface Treatment | Knurled, Plating etc. |
| Package | Plastic bag and carton |
| Used | Building industry machinery etc. |

3.Product features and applications

Hex Socket Head Captive Screws are more suitable for equipment panels where mounting hardware is easy to lose. These captive screws and retainers ensure easy and secure assembly and quick alignment. The Hex Socket Head Captive Screw's threads release a portion of the length under the head so the screw won't come off once it's passed through the panel with the washer on the other side.
