

## Knurled Insert Nut

Nut is a kind of original that all production machinery must use, Knurled Insert Nut is one of them, which is characterized by knurling for easy operation. Our company is a company in China specializing in the production of precision fasteners. We have a wide variety of products and different materials for you to choose from. These products are of high quality and low price.

### 1.Product Introduction

The biggest feature of Knurled Insert Nuts is that it has knurling, which is easy to install during operation and will not peel off when rotating, which greatly improves the efficiency. These Knurled Insert Nuts provide a stronger hold, making it a lot less work to follow, and the inserts are perfect for parts you plan to disassemble/reassemble multiple times.

### 2.Product Parameter

Product Name	Knurled Insert Nut
Material	Alloy, Stainless steel etc.
Surface Treatment	Knurled, Plating etc.
Package	Plastic bag and carton
Used	Building industry machinery etc.

### 3.Product features and applications

Knurled Insert Nuts can be installed anywhere in the assembly machinery process, before and after the product is finished. Knurled Insert Nuts do not deform under high pressure, are resistant to wear and have a long service life, and the knurled surface allows the nut to securely surround the insert. We can provide products in various sizes and materials if you need them.
