

## Miniature Pogo Pin

Compared with ordinary pogo pins, Miniature Pogo Pins are smaller in size and suitable for special places with small areas. Besides, our company also produces other precision fasteners of different types and materials. Our price is excellent and the quality is excellent, and we look forward to becoming your long-term partner in China.

### 1. Product Introduction

Like other pogo pins, the basic structure of Miniature Pogo Pins is a rotating barrel, a cutting plunger, and a compression spring. They are less prone to corrosion, oxidation, increased conductivity, and reduced impedance.

### 2. Product Parameter

Product Name	Miniature Pogo Pin
Material	Brass etc.
Package	Plastic bag and carton
Used	Building industry machinery etc.

### 3. Product features and applications

Miniature Pogo Pins have the advantages of small size, large current, strong contact, beautiful appearance and stable performance. They also have the advantages of short development cycle, low development cost and short delivery time, and can adapt to changing market demands. Miniature Pogo Pins are widely used in various industries.
