

Slotted Head Captive Screw

Slotted Head Captive Screw is a type of captive panel screw. Their heads are in the shape of a line, which is convenient to operate when in use. We are a company specializing in precision fasteners from China. We have a wide variety of products and different materials for you to choose from. These products are of high quality and low price. You are welcome to choose.

1.Product Introduction

Although Slotted Head Captive Screw is a type of Captive Panel Screw, it also has its own characteristics and uses due to different heads. Slotted Head Captive Screws add a length of screw to the tail, the captive screw is most often used to hold the panel, and it will remain in the panel when loosened.

2.Product Parameter

Product Name	Slotted Head Captive Screw
Material	Alloy, Stainless steel etc.
Surface Treatment	Knurled, Plating etc.
Package	Plastic bag and carton
Used	Building industry machinery etc.

3.Product features and applications

Hex Socket Head Captive Panel Screws are more suitable for equipment panels where mounting hardware is easy to lose. Our company has the expertise to supply metric and standard fixing panel screws in small, large or prototype quantities. Slotted Head Captive Screws are usually used to connect panels or circuit boards, leaving a certain gap in the middle for easy operation. They are

also suitable for connecting metal panels or other thin material components that require frequent application changes.
