

## Steel Worm Gear

Steel Worm Gears are strong and durable, they use threads to greatly reduce shaft speed while transmitting motion at right angles. In addition, our company also produces other precision fasteners of different types and materials. We are not only cheap but also quality guaranteed. We look forward to becoming your long-term partner in China.

### 1.Product Introduction

Steel Worm Gears have one or more teeth that are helical, providing the smoothest, quietest form of transmission. Steel Worm Gears provide high speed reduction ratios in minimal space, and efficiency can easily be increased by reducing the ratio.

### 2.Product Parameter

Product Name	Steel Worm Gear
Material	Alloy, Stainless steel etc.
Surface Treatment	Knurled, Plating etc.
Package	Plastic bag and carton
Used	Building industry machinery etc.

### 3.Product features and applications

Steel Worm Gears have a smooth, burr-free surface, which is beautiful to use and durable. Steel Worm Gears are widely used in non-parallel, non-intersecting, right-angle gear drive system applications requiring high gear ratios such as reducers, elevators, machine tools, chain blocks, fishing reels and automotive power steering.

### 4.Product Details

Below is the detailed picture introduction of our product Steel Worm Gears.

The images shown are representative of the product. In addition, we also have products of various sizes and materials for you to choose from.

### **5.About our company**

We are a factory located in Ningbo, China, specializing in the production of Steel Worm Gear. We offer a wide range of high quality Shoulder Screws in common sizes at attractive prices. All items listed are available and your order will be shipped by us immediately. If you have any questions, please feel free to email us or contact us via our contact form.
